----------------	-------	--------------	------------	--------------	--------------	-----------	-----------	-------------------	---	---------

## \* Compatibility chart and handling precautions \*

※1For the front, adjust the vehicle height using the standard torsion bar bolts.

※2The rear can be lowered using the included leaf springs.

※B/R stands for bumper rubber, which needs to be cut for each vehicle model. (Cutting chart attached to the product)

※In order for vehicles with rear leaf springs (Hiace 200 series, NV200 Vanette, Vamos/Vamos Hobio, Carry Truck)

to comply with vehicle inspections, a vehicle structure change application is required.

We can issue product strength calculation sheets required for structural changes (modification applications).

■The down mm value was measured on a representative vehicle model. There may be some errors depending on the vehicle model, so please consider it as a guide only.

[In rare cases, the vehicle's ground clearance may differ from our measurements.]

[Please check the ground clearance in advance and determine whether the stated lowering amount is acceptable.]

■All of our matching data is based on the original tires (summer tires) and original shock absorbers. If these have been replaced with aftermarket parts,

Please be aware that there is a possibility that the amount of lowering will differ from that in the compatibility table,

that it will interfere with parts of the vehicle, that it will produce strange noises, or that it will not pass vehicle inspection.

■Vehicles manufactured after January 2006 must be lowered so that the height from the bottom edge of the fog lamps to the front fog lamps is less than 250 mm

and the turn signal lamps are not turned on. "The height to the bottom edge of the headlight (low beam) is less than 500 mm" In any of the above cases,

This will violate safety standards and the vehicle will not pass inspection, so please check the height of your vehicle before installing it.

■Please check the vehicle model, type, engine, year, part number, and notes before installing.

■The price does not include installation costs.

■Product materials, specifications, down mass and price may change without notice.

■Please note that there are cars with lowered specifications available as dealer options. In that case, the amount of lowering will differ from the above.

■Even if the vehicle undergoes a minor change (same model), some vehicles may come with a lowered suspension as standard.

In that case, please note that the amount of lowering will differ from the above.

[Please be sure to read and understand our product warranty policy before purchasing and installing the product.]
