

POWER RADIATOR

OTYPE "A2" (wide aluminum two-layer type)

Top-of-the-line aluminum radiator reduces the load on the front overhang

OTYPE "A2S" (thin aluminum two-layer type)

Thin aluminum radiator with new outer fins

OTYPE "C3" (3-layer copper type)

The increased water flow rate and heat dissipation compared to the two-layer type are sufficient for hard driving.

OTYPE "C2" (copper double layer type)

Compared to the standard model, the increased water flow rate and increased heat dissipation provide a reliable cooling effect.

*The suggested retail price is for MT vehicles. AT vehicles are 14,520 yen (tax included) higher. A2 and A2S are not available.

*S/N indicates the compatibility of the radiator cap. S: Calsonic type N: Denso type

*Please note that if your vehicle requires a vehicle inspection certificate, the part may not be compatible even if it is the same model, or the list price may change.

*Please contact us if you have any questions about a vehicle model not listed above.
